About

I am Network Engineer with extensive experience of Cisco's Catalyst Center / Software Defined Access and Catalyst switching platforms. Adept at troubleshooting routed, switched and wireless networks, Linux and Windows systems, micro-services deployment, AAA and server infrastructures technologies.

I am looking for a career opportunity in which I can leverage my existing skillset, as well as expand my knowledge of other aspects of ICT, such as data centers, virtualization and automation.

I enjoy working in a structured environment with clear documentation that can help to collaborate more efficiently. I am a hard worker who doesn't shy away from the unknown but sees it as a possibility to learn.

WORK EXPERIENCE:

Team Lead / Technical Consulting Engineer

CISCO SYSTEMS BELGIUM

September 2019 - Present

Cisco DNA Center/Catalyst Center/SD-Access Solution Support team

- Troubleshoot and resolve complex network issues
 - SD-Access Fabric wired/wireless Overlay (LISP/VXLAN) and Underlay (L3 routed)
 - Wireless AP and client onboarding (CAPWAP, 802.11)
 - Client authentication/authorization (802.1x, RADIUS/TACACS, including Cisco ISE)
 - End-user device onboarding (DHCP, ARP) and profiling (CoA)
 - End-to-end segmentation using VRFs and TrustSec SGTs
 - East/West and North/South traffic investigation (incl. SDA Transit)
 - Audio/Video streams over multicast (IGMP, PIM, SSM, ASM)
 - SDN controller automation failure investigation (API, Kubernetes/Docker, Linux)
- Collaborate with different engineers across various technology groups
- Investigate root cause analysis of incidents and deliver analysis to stakeholders
- Evaluate and prioritize restoration services based on business impact
- File and reproduce defects to fix and improve the product
- Assist in escalations of high-profile cases to expedite resolution
- Lead weekly conference calls to review cases and advise peers
- Design, deploy, maintain and document lab environments for internal training, testing and reproductions
- Document technical procedures and troubleshooting guides for internal use
- Interview, onboard, train and coach new hires to the team

EDUCATION:

Master's Degree - IT Systems Architecture

MAGNA CUM LAUDE

HENALLUX Marche-en-Famenne (Belgium)

June 2019

Thesis: Automated Job Submission Management for Grid Computing

Thesis: Unikernel and Immutable Infrastructures

Bachelor's Degree - Information technology

MAGNA CUM LAUDE

HENALLUX Namur (Belgium)

June 2017

Thesis: Security Challenges Faced by Cloud Migration

INTERNSHIPS:

CISCO SYSTEMS BELGIUM - TECHNICAL INTERN

February - April 2019

Working with Ansible to automate Cisco DNA Center deployment

CETIC - INTERN

February - May 2018

Research and development on unikernel technologies

NVISO - INTERN AND STUDENT CONSULTANT

February - May 2017

Assisted in migrating from Google G Suite to a hybrid

July - August 2017/2018

Office 365 Enterprise solution
